

At G.Romano we are committed to sustainable manufacturing as we all benefit from a cleaner environment. We have instituted a number of initiatives and engaged the entire workforce in thinking about ways to further advance our eco-conscious approach to manufacturing: REDUCE, REUSE AND RECYCLE.

Foam Seats and Padding

Verde seats and padding are manufactured using natural, seed based oils such as soy bean, and it significantly reduces the dependency on fossil fuels such as petroleum and lessens greenhouse emissions.

Feather backs and seat cushions

90% /10% feather and down blend in a 100% non bleached, down proof cotton casing. Seats are feather and down, with a soy foam core

Wood frame

The wood harvested for use in our furniture comes from forests managed in accordance with policies & regulations that meet the objectives of the Canadian Forest Strategy.

All wood suppliers are FSC certified.

Glue

All glues and adhesives involved are a Solvent-free, 100% waterborne system and conforms to changing environmental regulations.

Fabric

G.Romano's growing selection of Eco-friendly fabrics includes luxurious natural fibres, recycled cotton, bamboo

Packaging

G.Romano's packaging is largely made up of recyclable materials.
